

ASSEMBLY INSTRUCTIONS

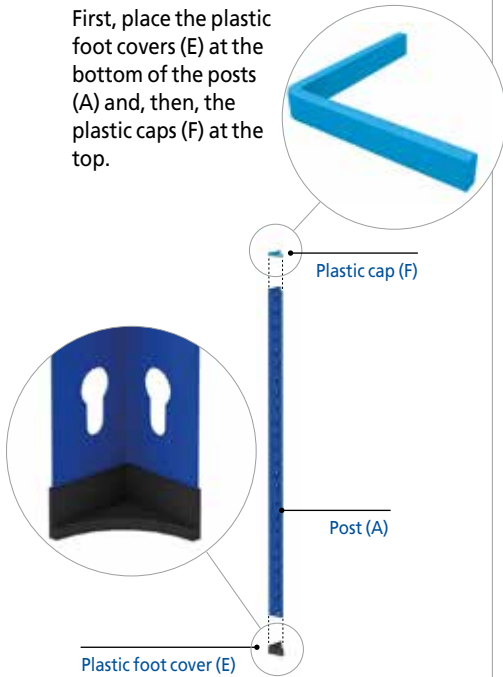

# WORKBENCH WITH LOWER SHELF

## Structure assembly

1

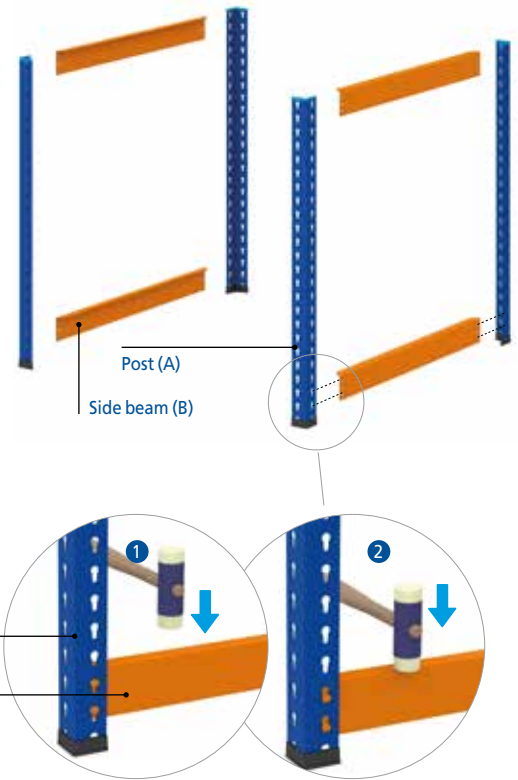

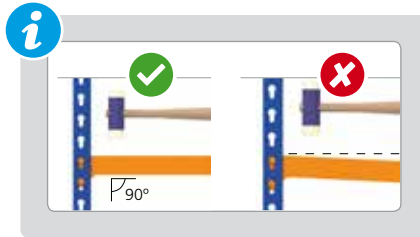

First, place the plastic foot covers (E) at the bottom of the posts (A) and, then, the plastic caps (F) at the top.

2

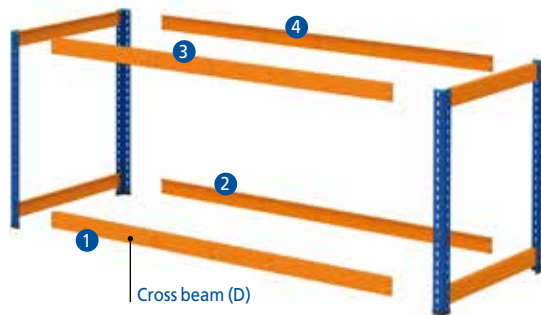

Next, assemble the side beams (B) starting with the lower level. Use a nylon mallet to tap the side beams (B) into place on the posts (A).

Before doing so, make sure the side beam (B) is set at a 90° angle to the post (A).

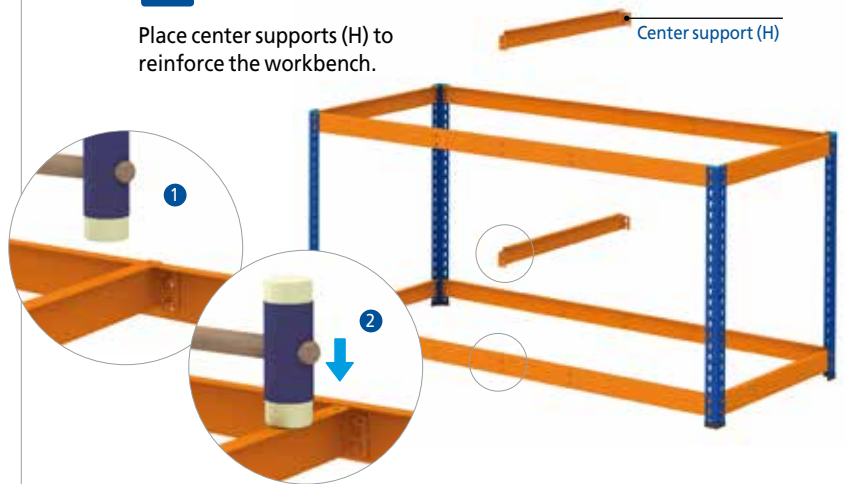

3

Then, insert the lower level cross beams (D), one in front and one behind, joining the two sides of the table. After that, insert the upper level cross beams (D).

4

Place center supports (H) to reinforce the workbench.

5

Finally, arrange the panels (C) starting with the lowest level. Rest them on the cross beams (D) and fit them with the plastic caps (F).
